SANKEN PRODUCTION **SHOTGUN MICS**

CS-M1

4 inch, 2 oz.
Short Shotgun

The CS-M1 sets new standards of sound quality for a short shotgun mic. From pro boom pole drama and film location recording to DSLR camera-mounted applications, the CS-M1 delivers pristine quality with sharp directivity. The CS-M1 is only 4" in length and weighs less than 2 oz.

Mono

CS-1e

Long Reach
Lightweight
Short Shotgun

The low cost CS-1e is a remarkably directional microphone, featuring a longer pickup reach, extended low frequency response and significantly lower noise. The lightweight CS-1e is easily handheld, mounted on a boom pole or concealed on the new smaller camera bodies.

Mono

CS-2

Exceptionally
Long Reach
& Rich, Natural
Tone

Standard length shotgun with greater directivity and extended reach via unique audio tube length, emulating longer shotguns. Proprietary rectangular diaphragm design offers a rich, natural tone throughout the frequency spectrum. HF boost compensates for frequencies lost at longer distances.

Switchable HF Boost

CSR-2

Highly
Directional
with Switchable
Rear Rejection

Another problem solver from Sanken, the CSR-2 microphone offers a rich, natural tone with optimum, extended reach. Its 3-capsule design features a unique switchable rear rejection feature. Overcoming this issue is unique to Sanken, another first in the industry.

Mono
Switchable Rejection

CS-3e

Long Reach
Side Rejection

The industry standard for difficult environments, the CS-3e offers a natural tone with wide frequency response and exceptionally narrow directivity. This 3-capsule design features a unique switchable side rejection of the mid and low frequencies. A low frequency roll-off is also offered.

CSS-50

Short
Switchable
Mono/Stereo

Thanks to Sanken's original thin square capsule design, 3-capsules can be installed in a shorter acoustic tube, maintaining basic shotgun performance while offering various selectable stereo modes. High-performance electret condenser capsules provide a wide frequency response, and high sensitivity.

Mono
Normal (Stereo 115°)
Wide (Stereo 140°)

CSS-5

Mono/Stereo
Normal (Stereo)
Wide (140°)

5-capsules and 3 imaging modes for a variety of applications in location and studio recording. Mono mode provides high directivity over a wide frequency spectrum, especially below 500Hz. Excellent for noisy environments and capturing realistic stereo perspectives. Low proximity effect.

Wide (140°)

CMS-10

Compact
Stereo for
Quality
Camera Audio

Introduced as the world's first camera-mount stereo shotgun mic, the CMS-10 has become the new industry-wide switchable stereo/mono mic. Using M-S capsule techniques, it offers a superior frontal directivity, mono compatibility and superior localization in the stereo field.

CMS-50

Stereo M-S
Figure-8 &
Cardioid

The unique CMS-50 is a 5.4" compact M-S (Mid-Side) stereo condenser shotgun that weighs only 4.6 oz and is especially suited to shoots where tight patterns and premium sound are the goal. The M-S configuration makes it possible to adjust stereo width at the mixer or in post.

New CS-M1

Compact Shotgun for Boom Pole Drama and Mobile Camera Mounting

At only 4" in length and weighing less than 2 oz., the unobtrusive CS-M1 is the latest addition to the Sanken Production microphone range and sets new standards of sound quality for a short shotgun mic, delivering pristine quality audio with sharp directivity.

Capture the Action with Sanken Production Shotgun Mics

Sanken Microphone Co., Ltd. is one of the leading professional microphone manufacturers in Japan, established in 1926.

Performance, reliability and outstanding sonic quality characterize Sanken shotgun mics and are the reasons why they have gained worldwide popularity with production and sound design professionals.

With 9 different models to choose from including mono, stereo & M-S formats, Sanken can satisfy all of your shotgun production needs.
