SANKEN LAVALIER MICROPHONES

COS-11D

The COS-11D ultra-miniature lavalier mics have become the industry standard for high-quality production and live sound.

Sanken Microphones is proud to be honored by the Academy of Motion Picture Arts and Sciences with a Scientific and Engineering Award plaque for the development of its innovative, ultra-miniature COS-11 lavalier microphone technology.

Available in 4 colors, with XLR, Pigtail and Wireless connectivity options and accessories, these mics deliver a full-bodied clarity of sound even under the harshest conditions.

**HEAR THE
DIFFERENCE**

The new generation COS-11D ultra-miniature lavalier was designed to meet today's HD audio standards while providing greater immunity to RF interference.

The COS-11D is available in four colors (Black, White, Gray, and Beige) and with many connectivity options and accessories. It features a front mesh screen which is water resistant, better protecting the microphone from perspiration and cosmetics, and is ideal for outdoor shooting in foul weather.

Sanken introduced the vertical capsule where the diaphragm has a much greater effective area within an extremely small casing. Sanken has combined extensive R&D with the world's most advanced precision craftsmanship for the ultimate in sensitivity and natural sound.

Main Features...

- Increased immunity to RFI
- Improved durable design
- Same great clear and rich sound
- Four color choices
- Robust moisture resistance
- Unique vertical diaphragm design
- Clear and natural sound
- 20Hz-20kHz with 95dB dynamic range
- Optimized for the human voice
- 2.1mm rugged cabling resistant to sweat, stays soft and pliable even after extended use

COS-11D
